

WATERJET CUTTING

Capabilities Statement

With over 27 years experience in Waterjet cutting applications, we can do your custom fabrication and hard tooling development with a prompt turn around. We're a subcontractor for several 2nd and 3rd tier Aerospace companies and have been ISO certified since 2002, currently ISO 9001:2008/AS9100C certified.

Titanium forgings, steep chamfers in graphite epoxy, 10" thick aluminum and bullet-proof glass; all equal *DS&T Waterjet cutting at its best!*

FACILITY • Built 2008 • 14,000 sf • 22' clear height

EQUIPMENT

- Waterjet—Flow International 2005 & 1998
- Cutting Area—72" x 144" x 10"
- Material Size—96" x 360" x 10"
- Tolerance—+/- .003"
- Zero Taper capability

CERTIFICATIONS & CODES

- | | |
|-----------------------|--|
| • AS9100 | • Duns 088035352 |
| • ISO 9001:2008 | • Cage Code: 1QFW7 |
| • Fracture Critical | • NAICS 332710, 333512, 333515, |
| • Boeing Registered | 332999, 332322, 332323, 339950, |
| • Woman-Owned Company | 339999, 332313, 332333 |
| • Small Business | • Dynamic Small Business Registered |
| • SAM Registered | • Militarily Critical Technical Data Agreement |

ADDITIONAL CAPABILITIES

MACHINING

- CNC Milling—Up to 30 hp, 10,000 rpm, 40" x 20" x 20"
- CNC Lathes—Up to 40 hp, 22" swing, 30" between centers

FABRICATION

- Welding—Certified AWS D1.1 (Mild Stl), D1.2 (Alum), D1.6 (SS)
- Forming—250 ton Press, 1/4" x 120"

DEFINITIVE SOLUTIONS & TECHNOLOGIES, INC.

Commitment to Excellence, Innovation and Perfect Parts

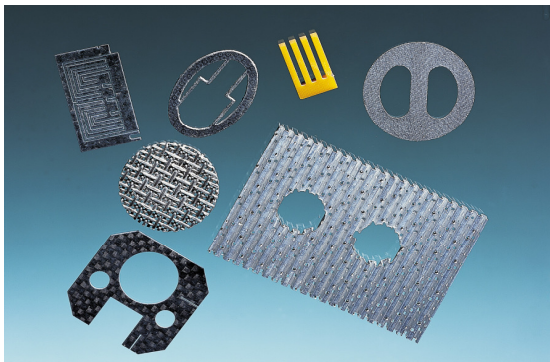

DS & T machines with Dynamic Waterjet®
produce zero taper parts.

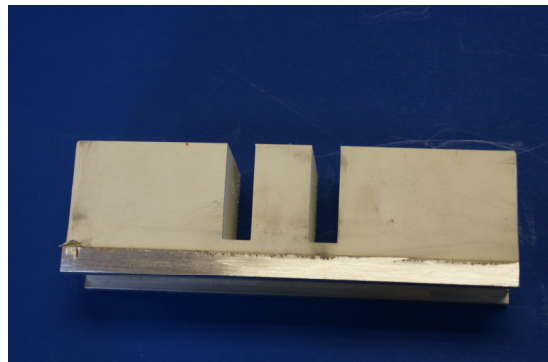

Steep chamfer on graphite composite.

Various parts cut from aerospace materials.

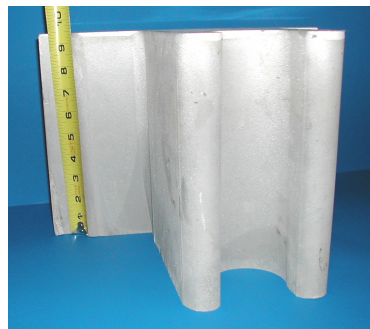

Rubber extrusion puller cleat.

Leaded nuclear glass.

Parts and materials up to 10" thick.
